International Development in Urban Contexts

Utrecht, 24 September 2015
International Development in Urban Contexts

Agenda

1. Introduction
2. Context
3. Issues
4. Approach
5. Discussion
High growth in urban population (interactive)

AN URBAN WORLD

This graphic depicts countries and territories with 2050 urban populations exceeding 100,000. Circles are scaled in proportion to urban population size. Hover over a country to see how urban it is (percentage of people living in cities and towns) and the size of its urban population (in millions).

Urban Population
- Greater than 75%
- 50% - 75%
- 25% - 50%
- Less than 25%

THE GLOBAL GOALS
For Sustainable Development

1. No Poverty
2. No Hunger
3. Good Health
4. Quality Education
5. Gender Equality
6. Clean Water and Sanitation
7. Renewable Energy
8. Good Jobs and Economic Growth
9. Innovation and Infrastructure
10. Reduced Inequalities
11. Sustainable Cities and Communities
12. Consumption
13. Climate Action
14. Life Below Water
15. Life on Land
16. Peace and Justice
17. Partnerships for the Goals

#GLOBALGOALS
GOAL 11

MAKE CITIES AND HUMAN SETTLEMENTS INCLUSIVE, SAFE, RESILIENT AND SUSTAINABLE

SUSTAINABLE DEVELOPMENT GOALS
More at sustainabledevelopment.un.org/sdgsproposal
Urban imperative

Targets

- By 2030, ensure access for all to adequate, safe and affordable housing and basic services and upgrade slums
- By 2030, provide access to safe, affordable, accessible and sustainable transport systems for all, improving road safety, notably by expanding public transport, with special attention to the needs of those in vulnerable situations, women, children, persons with disabilities and older persons
- By 2030, enhance inclusive and sustainable urbanization and capacity for participatory, integrated and sustainable human settlement planning and management in all countries
- Strengthen efforts to protect and safeguard the world’s cultural and natural heritage
- By 2030, significantly reduce the number of deaths and the number of people affected and substantially decrease the direct economic losses relative to global gross domestic product caused by disasters, including water-related disasters, with a focus on protecting the poor and people in vulnerable situations
- By 2030, reduce the adverse per capita environmental impact of cities, including by paying special attention to air quality and municipal and other waste management
- By 2030, provide universal access to safe, inclusive and accessible, green and public spaces, in particular for women and children, older persons and persons with disabilities
- Support positive economic, social and environmental links between urban, peri-urban and rural areas by strengthening national and regional development planning
- By 2020, substantially increase the number of cities and human settlements adopting and implementing integrated policies and plans towards inclusion, resource efficiency, mitigation and adaptation to climate change, resilience to disasters, and develop and implement, in line with the Sendai Framework for Disaster Risk Reduction 2015-2030, holistic disaster risk management at all levels
- Support least developed countries, including through financial and technical assistance, in building sustainable and resilient buildings utilizing local materials
Urban poverty

More than 70% of the world’s poorest people live in middle-income countries, most of them in urban areas.

Around 1/3 of the urban populations in developing countries are living in slums.

40% of the world’s population lacking access to adequate sanitation. 1.2 billion people having no sanitation facilities at all.

Deal with poverty in each city and you will get rid of global poverty. The closer you are to a problem, the greater your chances of solving it!
Approach for defining strategic intent and models

State of Children

1. Developed Context
   - Urban Context
   - Rural Context
   - Protected Context

2. Effects of Trends

3. Strategic Shifts

4. Strategic Intent
   - Strategic direction: recommendations & actions with urgency
   - ...
   - ...

5. Changes to Models

© 2015 WORLD VISION - GLOBAL OFFICE OF STRATEGY, COLLABORATION & INNOVATION
Based on humanitarian imperative, state of children, and effects of trends, consider strategic shifts as:

1. Vulnerability is multi-dimensional and increasing whilst poverty is decreasing
2. Many Megatrends “live together” and when “stacked” can either have huge positive or huge negative impact on well-being of most vulnerable
3. People are becoming more vulnerable everywhere and particularly in urban contexts
4. Today, most NGOs are not fully prepared to make necessary strategic shifts
5. Based on these shifts, large emerging gaps in NGO capabilities need to be addressed to realise their vision
Vulnerability should consider multiple dimensions

<table>

Note: each cell shows Number of vulnerable children (in millions, for 2010 and 2030) and Compounded Annual Growth Rate (CAGR, as percentage, 2010-2030), per context and age bracket.

---

Absolute growth is highest in developing urban contexts

Relative growth is highest in fragile & developing urban contexts
Fragile / failed countries

- Afghanistan
- Armenia
- Azerbaijan
- Burkina Faso
- Burundi
- Central African Republic
- Chad
- DR Congo
- Egypt
- Ethiopia
- Georgia
- Iraq
- Libya
- Mali
- Myanmar
- Niger
- Nigeria
- North Korea
- Sudan
- Pakistan
- Somalia
- South Sudan
- Syria
- Tunisia
- Yemen
- Zimbabwe

- Sri Lanka (transitioning to Developing)
- Cote d’Ivoire (transitioning to Fragile)

**Fragile/developing/developed** context designations:
1. Fragility categories determined using the Failed States Index (FSI) and the Global Peace Index (GPI) with a 50%/50% weighting.
2. Border between fragile/developing/developed contexts uses similar cut-off points as the Fund for Peace and Vision for Humanity with a 50%/50% weighting.
3. For simplification, assume 2030 fragility is the same as 2013, the last reported year.
4. Ensured countries identified as Key Crisis Areas in the International Crisis Group’s Annual Conference were included in the ‘fragile’ context.
5. Shift countries from the ‘developing’ to ‘developed’ context if the real GDP per capita for a ‘developing’ country is greater than the minimum real GDP per capita in the ‘developed’ context. (Source, including 2030 real GDP per capita projection: [http://www.ers.usda.gov/data-products/international-macroeconomic-data-set.aspx#.Uxqow0JdW9Q](http://www.ers.usda.gov/data-products/international-macroeconomic-data-set.aspx#.Uxqow0JdW9Q))
Substantial urban population growth in Field offices

In 10 largest cities with Field offices, the total urban population is growing by 50 million.

Support Office
- 2030 (Δ)
- 2010

Field Office
- 2030 (Δ)
- 2010

no programming
- 2030 (Δ)
- 2010

Significant population growth in major cities.

EXAMPLE
Today, most NGOs are not fully prepared to make necessary strategic shifts.

- **Ministry Model**: Theory of Change, Programming
- **Operating Model**: Operations, Strategy
- **Funding Model**: Funding Sources, Resourcing
- **Engagement Model**: Partnering, Governance

**Impact on Vision**
- If no changes: by 2030, what will be bottomline contribution of your organisation to achieving the vision?
- What strategic shifts does your organisation need to make to achieve its vision by 2030?
Due to shifts, emerging gaps in NGO capabilities need to be addressed to realise their vision.

<table>

International Development in Urban Contexts

Agenda

1. Introduction
2. Context
3. Issues
4. Approach
5. Discussion
Considering your vision and mission, and with honesty & integrity:

1. **Do we have strategic intent for addressing the needs of the most vulnerable in urban contexts?**

2. **How well or poorly prepared are we to address the needs of the most vulnerable in urban contexts?**
